

# Routing Information Service Status and Plans

James Aldridge, Lorenzo Colitti, Daniel Karrenberg,  
Henk Uijterwaal, Arife Vural, Matthew Williams,  
Alexis Yushin

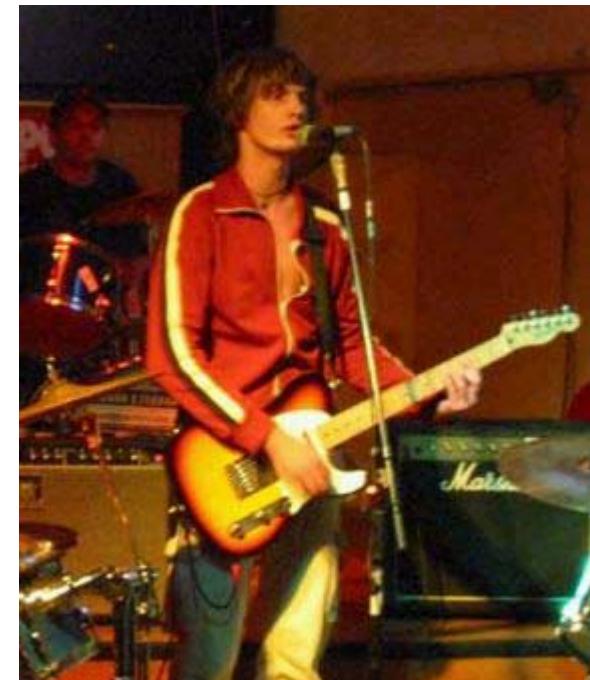

RIPE NCC  
RIPE 48, Amsterdam, May 2004

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

# Staff

- Alexis Yushin with us temporarily as a contractor
- Took over from where Maximo Alves, who decided to return to Brazil last year, left the myASn prototype
- Currently coding myASn β

# Some Changes at New Projects

- Old Situation:
  - New Projects became involved in running the data collection infrastructure and maintaining the software
  - Claimed time and resources from the intended tasks
- New Situation after the Summer:
  - Operations and Software departments will assume responsibilities where appropriate
  - New Projects will focus on:
    - Analysis of Data
    - New Services
    - Prototyping
    - Collaborations with the Research Community

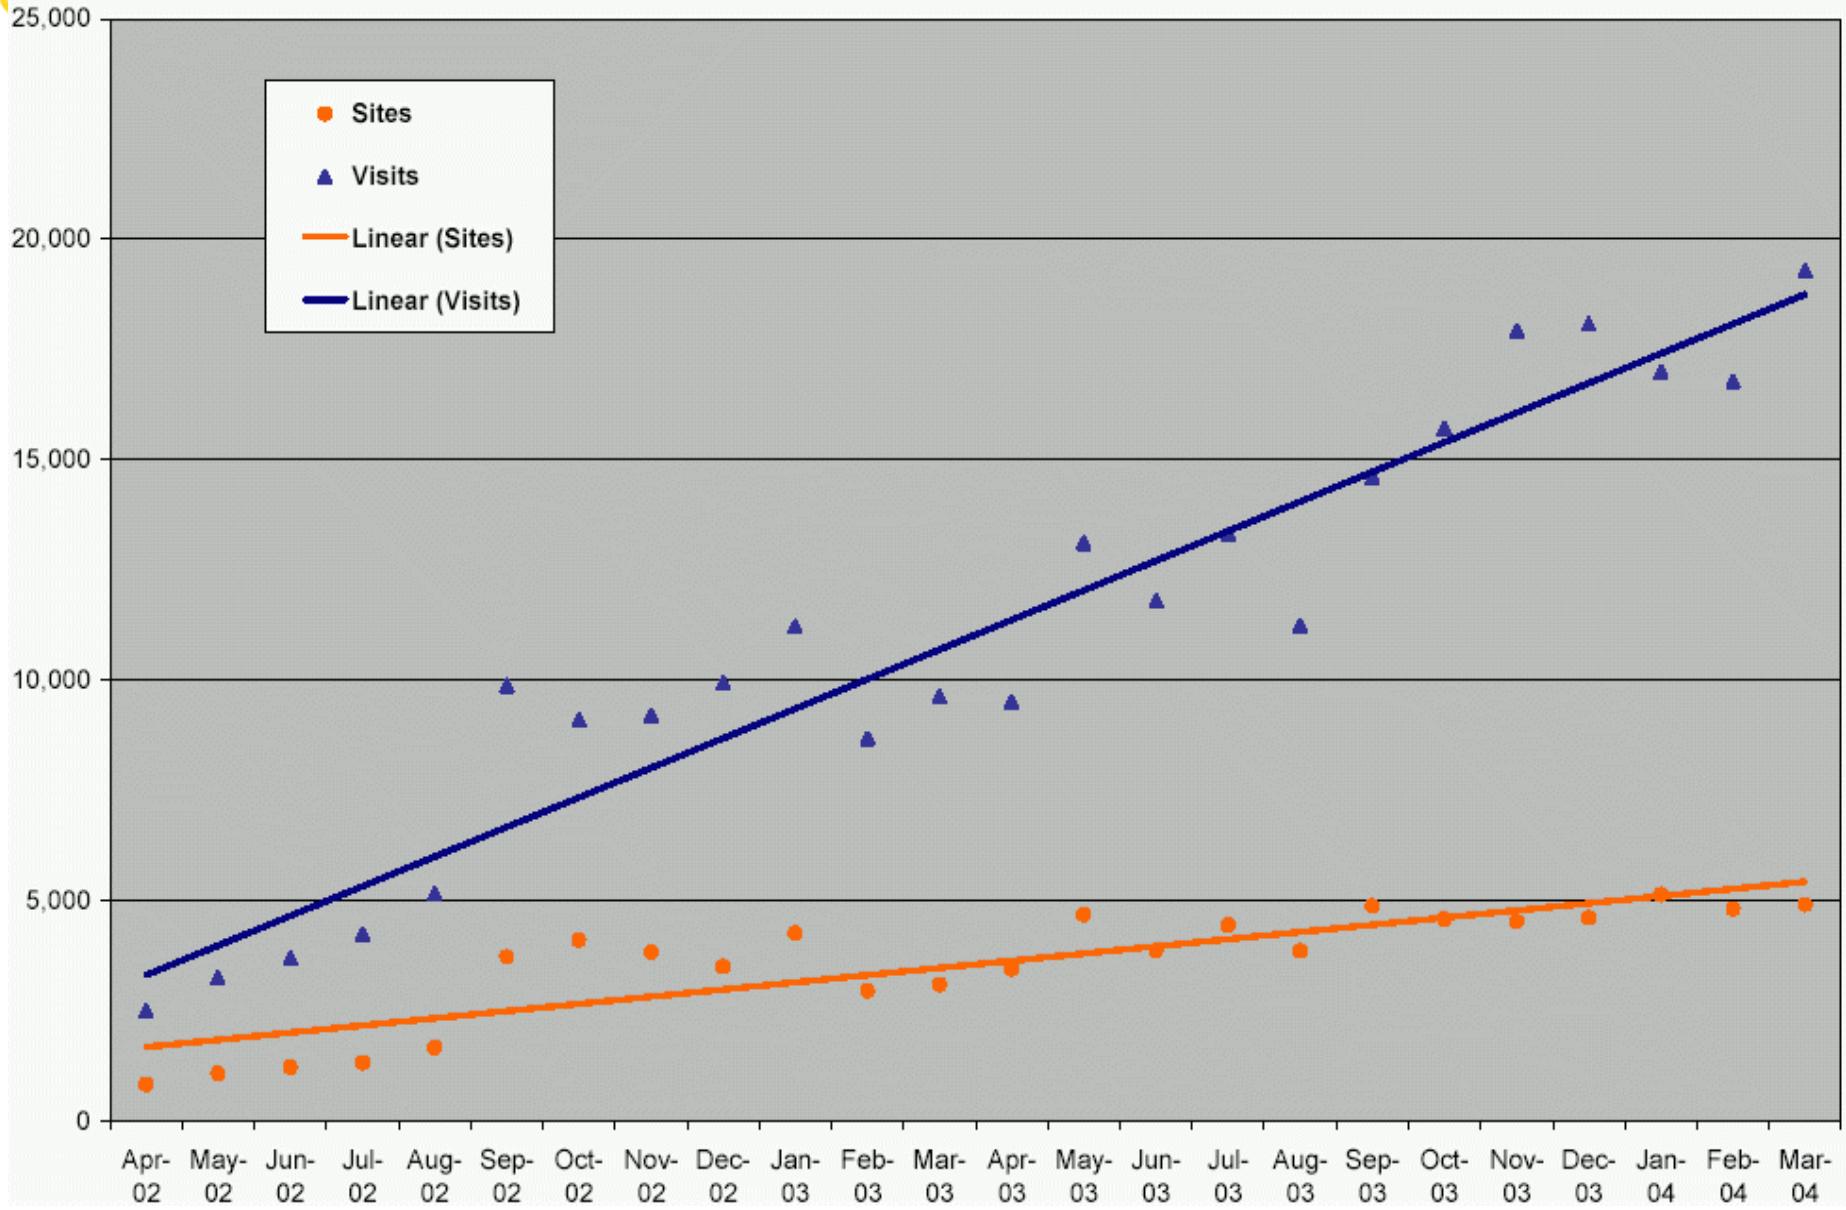

# Time Schedule

- |  |             |
|--|-------------|
| 1. Preparations:   | Ongoing     |
| 2. O/S Upgrade RRC   |             |
| – Internal work:   | 10/5 - 31/5 |
| – Distribute CD's, remote upgrades:                                      | 1/6 - 21/6  |
| 3. Integrate Hardware into OPS Maintenance Scheme:                       | 1/6 - 21/6  |
| 4. Helpdesk Handover to SED  |             |
| – Training:  | 10/5 - 16/6 |
| – Peering requests by SED helpdesk                                       | +/- 18/5    |
| – Other requests by SED helpdesk   | +/- 16/6    |
| 5. Software Handover   | 16/6 - 15/7 |
| • <b><i>Contact email addresses will naturally remain the same ☺</i></b> |             |

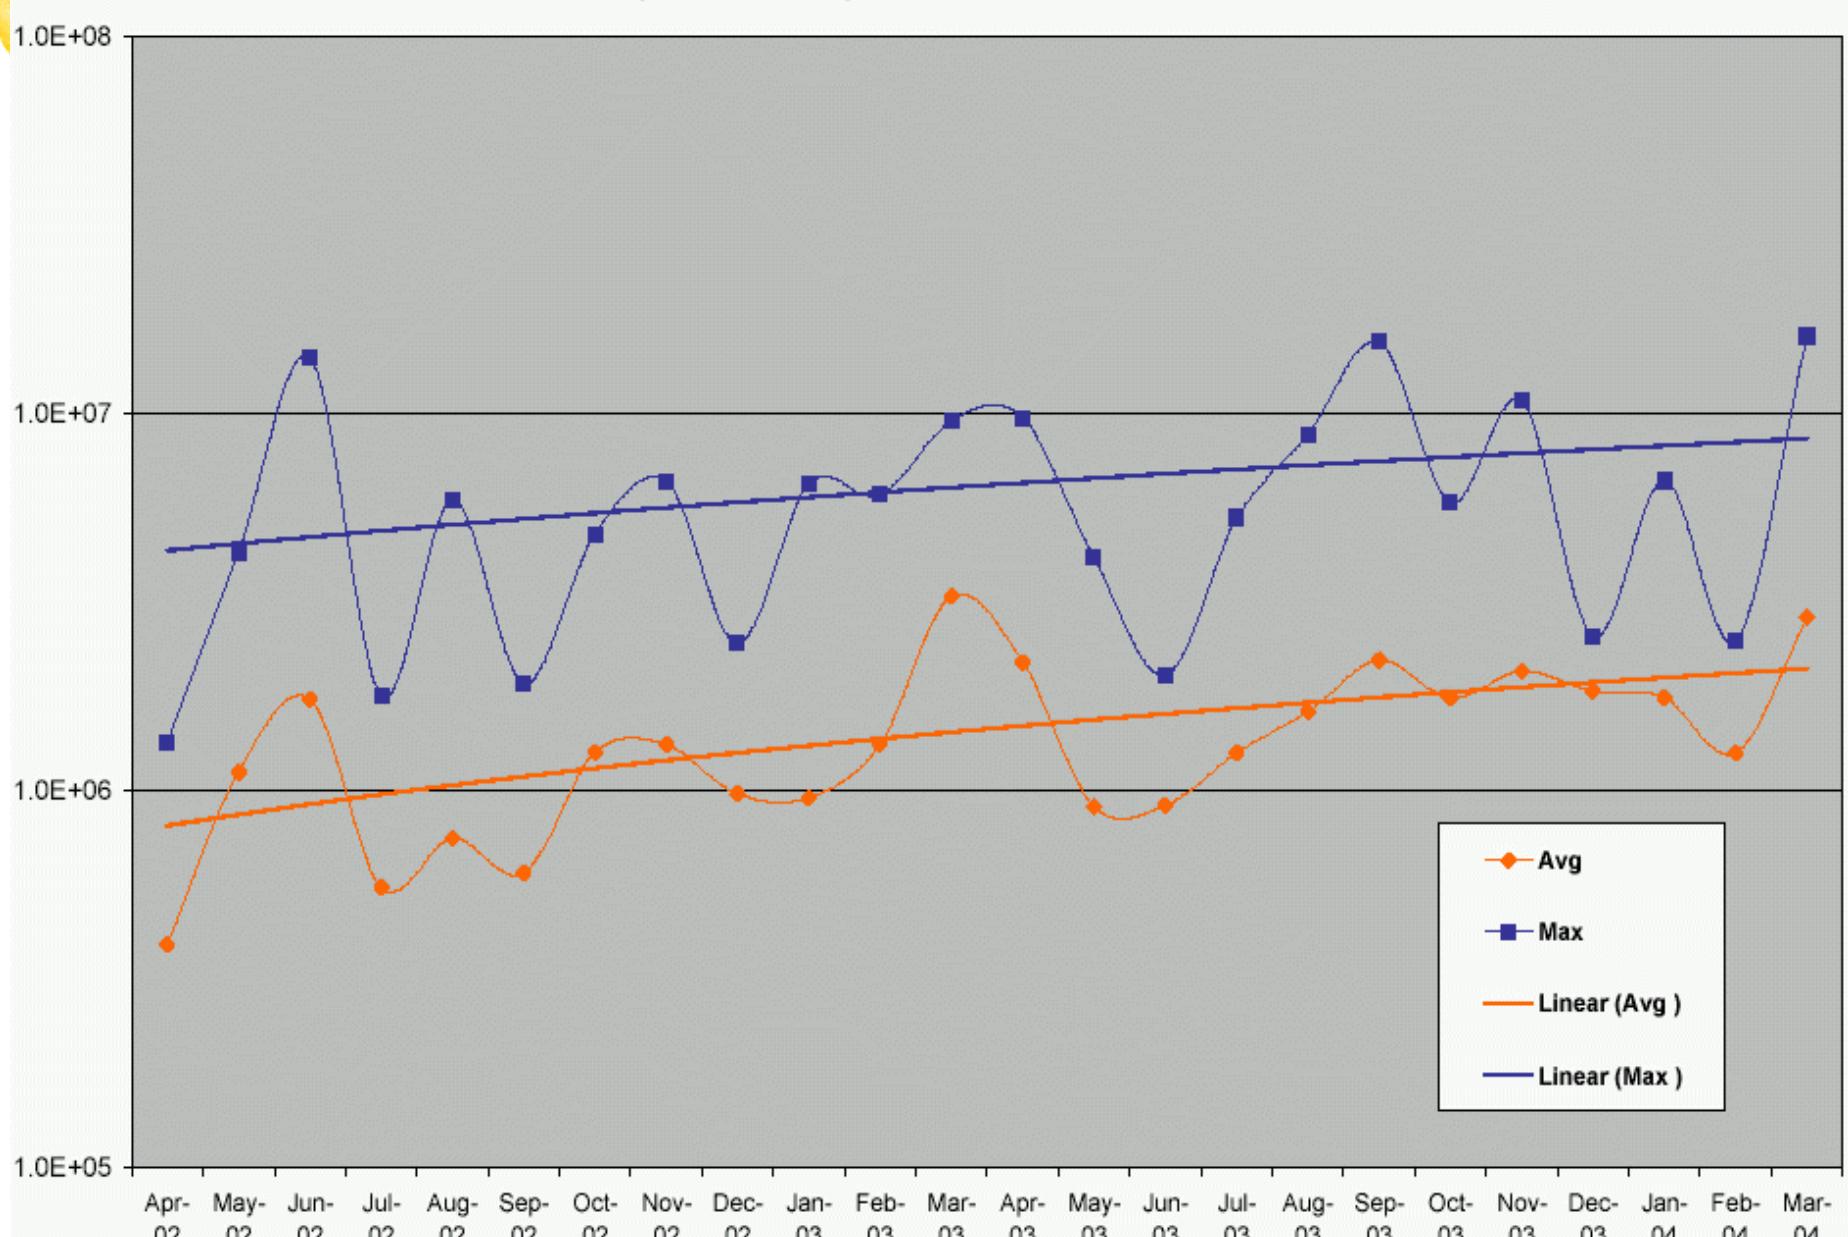

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

## Sites and Visits per Month for RIS Web Sites (aggregate values)

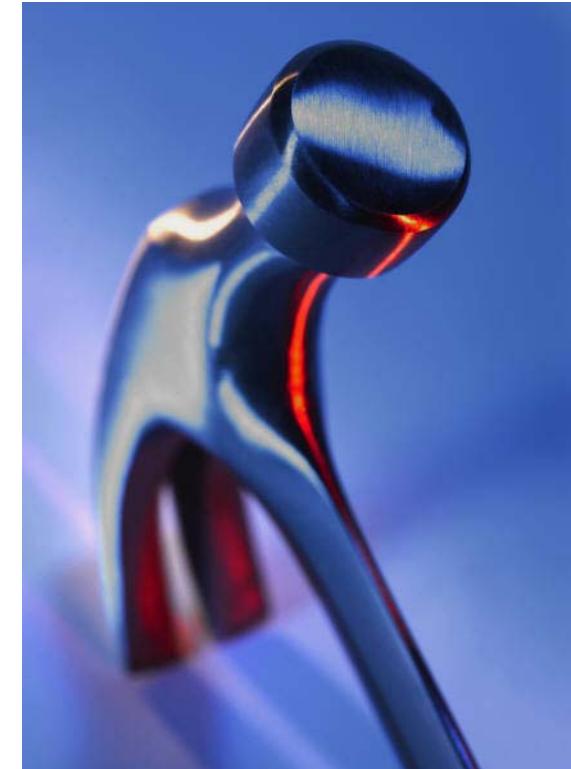

# Kbytes per Day for RIS Raw Data Site

# Web Statistics (cont.)

## *Most Popular RIS Utilities (March, 2004)*

1. RIS Looking Glass
2. ASinuse
3. Prefix Query

**1,2 & 3 represented ~80% of RIS Portal's hits**

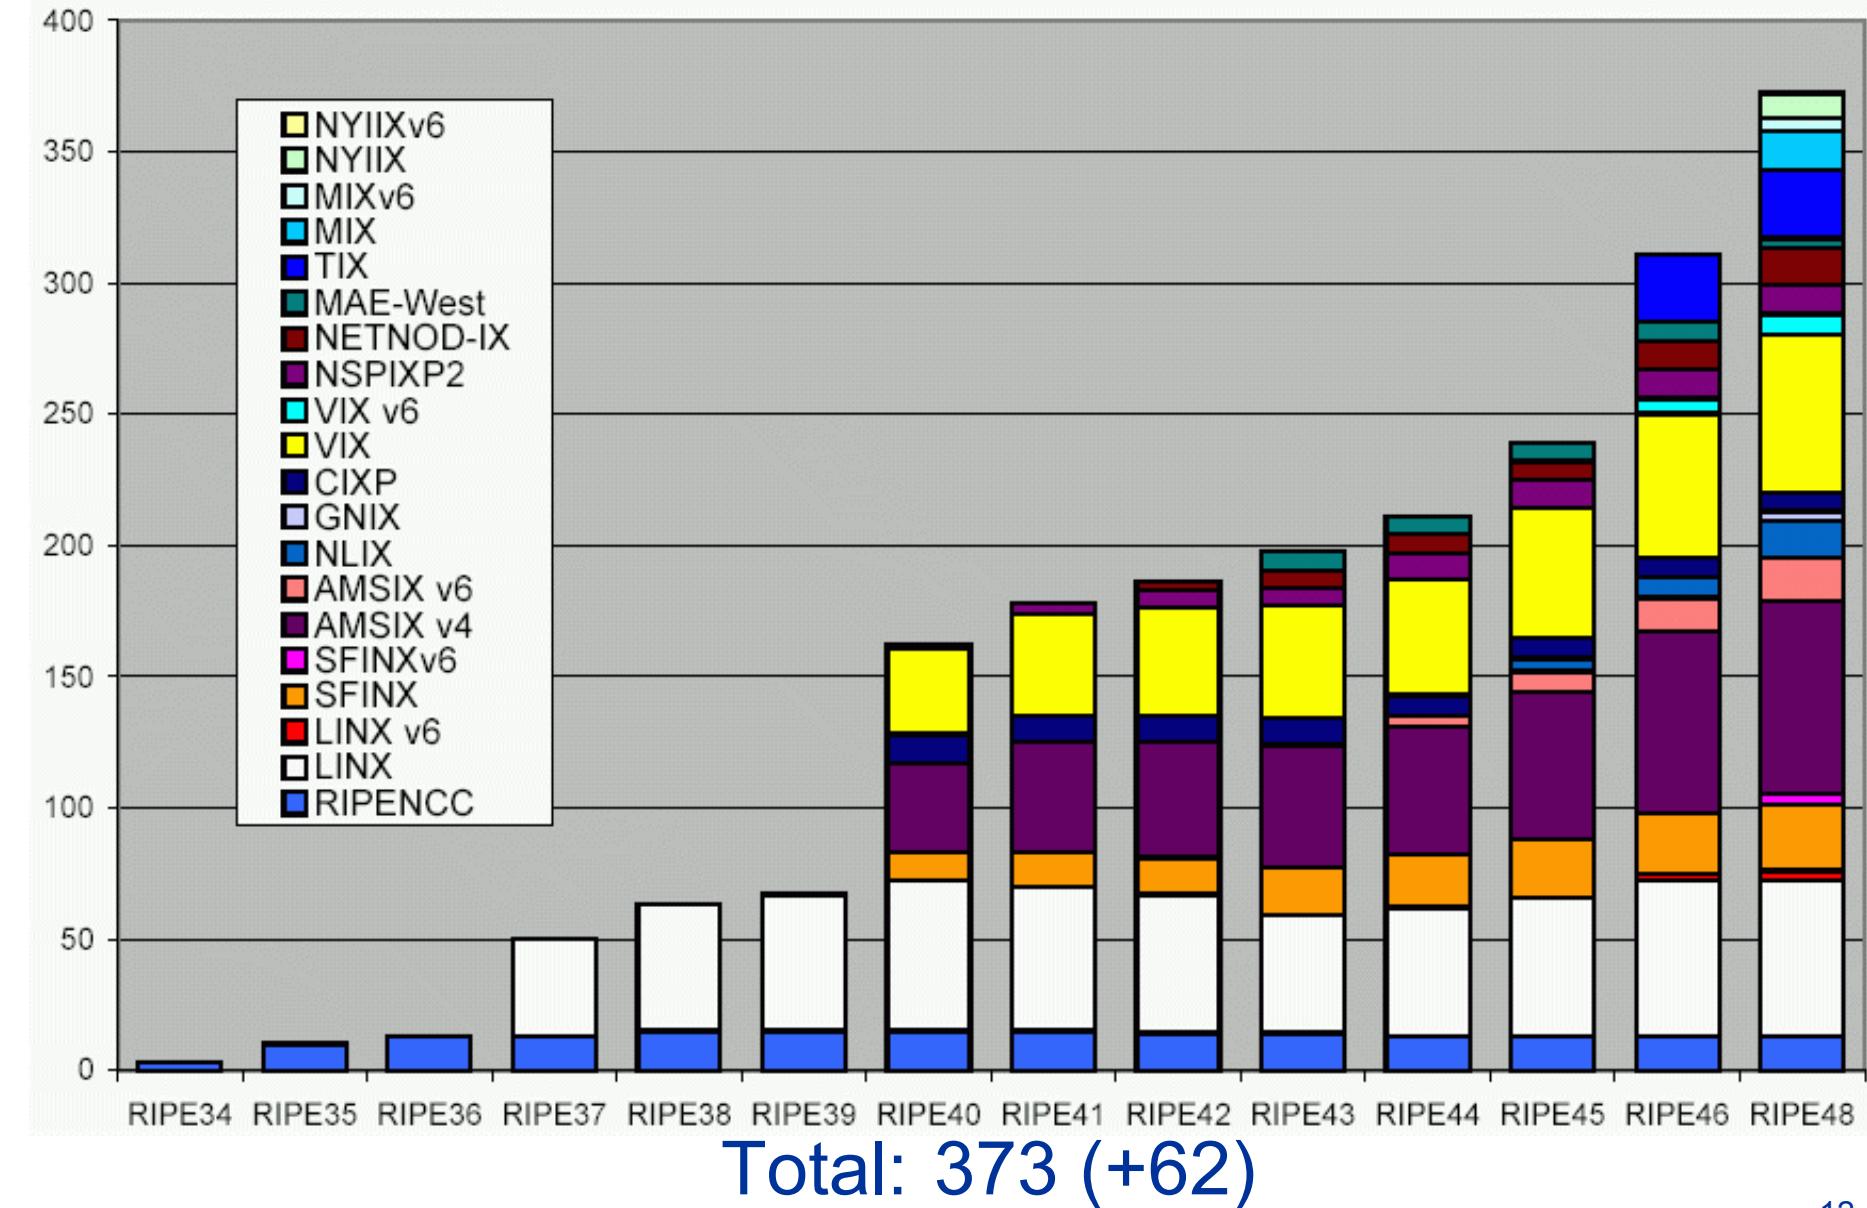

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

# Remote Route Collectors

- Changes Since RIPE 46
  - Peering presence at **three** more IXPs:
    - GN-IX (Additional NIC in RRC03)
    - MIX (RRC10)
    - NYIIX (RRC11)
- MD5 Support (RFC 2385) on some RRCs, not RRC01, RRC02, RRC06, and RRC10
  - Deadline 14.05.2004
- Hardware problems lately on RRC02 (SFINX) and RRC10 (MIX)
  - RRC02: Old, dead & out of warranty, so new HW shipped to SFINX
  - RRC10: Fixed within days by exchanging the motherboard with the assistance of responsive MIX staff
- **New RRC planned for DE-CIX in Frankfurt**

# Peering Sessions over Time

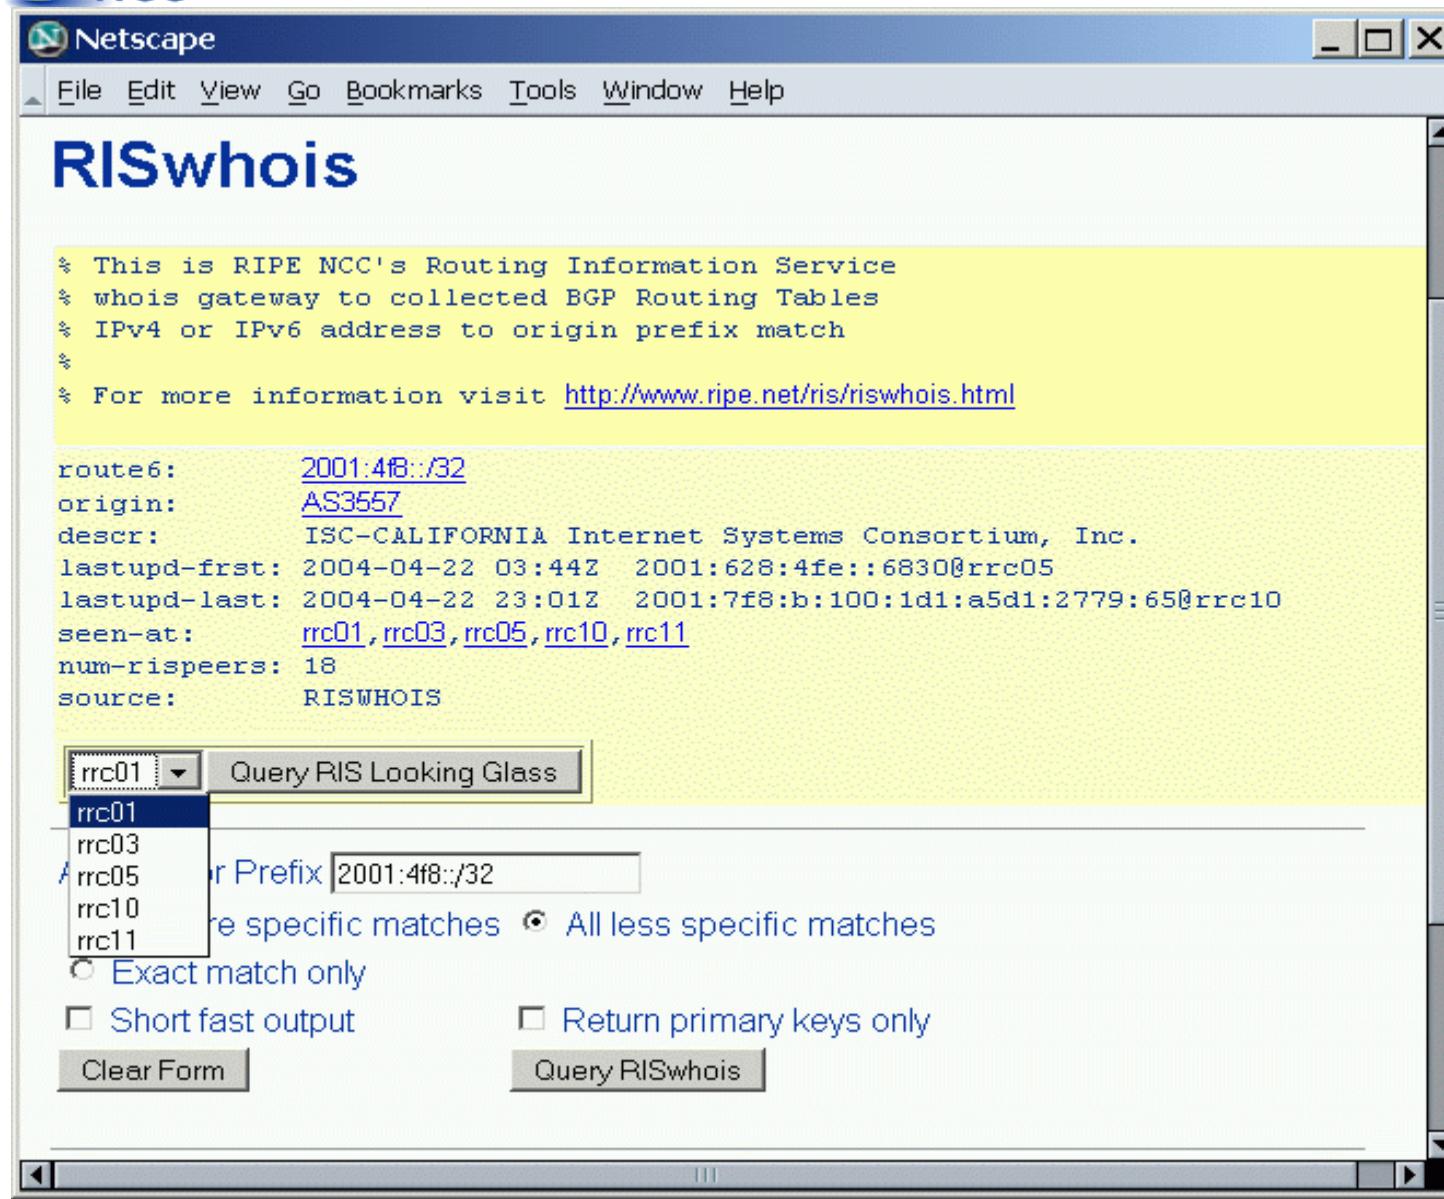

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

# RIS Developments

- Finally RISv6
  - Collection of raw data, Nov 2002
  - RISng (IPv6 support) in production, July 2003
  - RIS dBase insertion, April 2004
  - IPv6 CGI queries, May 2004
- ‘libbgpdump’ v 1.4
  - Collaboration with Agilent
  - Used by the RIS dBase insertion process
  - Some features:
    - IPv6 support
    - Better handling of corrupt raw data than route\_btoa
    - Tarball includes ‘bgpdump’ - drop-in replacement for route\_btoa
  - <http://www.ris.ripe.net/source/> (available by CVS mid-May)

# RISwhois Web Interface

\* This is RIPE NCC's Routing Information Service  
\* whois gateway to collected BGP Routing Tables  
\* IPv4 or IPv6 address to origin prefix match  
\*  
\* For more information visit <http://www.ripe.net/ris/riswhois.html>

route6: 2001:4f8::/32  
origin: AS3557  
descr: ISC-CALIFORNIA Internet Systems Consortium, Inc.  
lastupd-frst: 2004-04-22 03:44Z 2001:628:4fe::6830@rrc05  
lastupd-last: 2004-04-22 23:01Z 2001:7f8:b:100:1d1:a5d1:2779:65@rrc10

# MOAS Report (cont)

The screenshot shows a classic Netscape browser window with a blue header bar. The title bar says "Netscape". The menu bar includes "File", "Edit", "View", "Go", "Bookmarks", "Tools", "Window", and "Help". The main content area displays the "Report for IPv6" page. It features a large blue heading "Report for IPv6" and a link "Jump to IPv4 Report". Below this is a section titled "Origin Autonomous Systems" with a link "Jump to: Origin AS-Set List | Prefix List". It shows "Number of origin ASes: 9" and a list of AS numbers: AS109, AS559, AS786, AS1752, AS2547, AS2914, AS5417, AS12779, AS12859. A horizontal line separates this from the next section. The second section is titled "Origin AS-Sets" with a link "Jump to: Origin AS List | Prefix List". It shows "Number of origin AS-Sets: 5" and a list of AS-SETs: AS-SET{2614,6722}, AS-SET{818,2884,7860,8111,65002}, AS-SET{818,2884,7860,8111}, AS-SET{818,7860,65002}, AS-SET{818,7860}.

- <http://www.ripe.net/ris/query.html#stats>

# BGPlay

- Path visualisation tool hosted by RIPE NCC
- Developed by the Computer Networks Research Group at Roma Tre University
- Quick demo after this talk by Lorenzo Colitti

# Debogonising New Address Blocks

- Announcing /16 and /21 pilot prefixes from new IPv4 /8s allocated by IANA to RIPE NCC
  - Help operators to update their Bogon filters accordingly before RIPE NCC starts making its allocations to LIRs
- 
- Demonstrates the value of having the RIS
    - Prefixes injected into global routing table using RRC03
    - Monitoring of prefix visibility by querying the RIS dBase

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

# Status of RISv6

- More IXPs...
  - IPv6 peerings now at SFINX, MIX and NYIIX, previously only LINX, VIX and AMS-IX
  - **38 Sessions** altogether (+16 since RIPE 46)
- RIS Looking Glasses support IPv6
- Raw data, dBase insertion, and finally getting there with CGIs
- URLs for IPv6 Queries
  - TBA on [ris-users@ripe.net](mailto:ris-users@ripe.net) in May

# Status of myASn

- Rewrite of the myASn prototype (not doing AS path matching as expected)
- myASn β nearly ready for testing
  - All RRCs processed (myASn prototype: only rrc03)
  - myASn integrated into LIR portal ‘look and feel’
  - Prototype users will be migrated to the beta system
- Adapting old documentation to suite the new version
- Around **200 myASn accounts** created on the prototype (Thank you! ☺)
- Test users are added to the myASn mailing list:  
[myasntesting@ripe.net](mailto:myasntesting@ripe.net)

# Overview

- Administrativa
- RIS Web Access
- Remote Route Collectors
- RIS Developments
- Ongoing Projects
- Epilogue

# Summary

- Remote Route Collectors
  - 12 active collectors on three continents
  - More than 370 IPv4 and IPv6 peering sessions
- RIS Developments
  - RISv6
    - dBase insertion and beta queries
  - ‘libbgpdump’
    - IPv6 support
  - RISwhois Web Interface
    - Nice integration with other RIS features
  - MOAS report
- Projects
  - RISv6
    - Extending IPv6 to more RRCs, currently 38 peerings at six IXPs
  - myASn
    - $\beta$  nearly ready, see demo

# Next Steps

- Move RIS operations and software maintenance out of NP, then study other applications of the data for the community
- Make CGI queries IPv6-compatible
- Patch RRCs for MD5 support
- Deploy collector at DE-CIX, fix RRC02 at SFINX
- Continue work aimed at turning myASn into a RIS service integrated into the LIR portal

# RIS demo

- Test-drive the RIS
- Expert help available during coffee breaks on Wednesday and Thursday
- Feedback please 😊
